

Elevate Your Practice. Deepen Your Impact.

GEI Neurodivergence in Adults Workshop

Empowering Inclusive Care for Transgender and Gender-Diverse (TGD) Patients

Presented as a pre-course at the USPATH Scientific Symposium

Santa Ana Pueblo, NM | ⓘ September 26–30, 2025

Join us for an immersive, hands-on workshop designed specifically for medical and behavioral health professionals committed to advancing affirming care for transgender and gender-diverse (TGD) individuals. This in-person training—part of the USPATH Scientific Symposium—offers a unique opportunity to deepen your clinical expertise in a collaborative, multidisciplinary setting.

Led by experienced clinicians, the workshop will delve into the intricate intersection of neurodivergence, with a focus on autism and gender diversity. This workshop equips participants with practical strategies to support individuals who are both neurodivergent and gender diverse effectively. You'll leave equipped with the tools to provide trauma-informed, inclusive care that honors each patient's identity, autonomy, and well-being.

What You'll Learn

- Evaluate the intersectionality of neurodivergence with other identities, including gender, race, and sexuality, with a focus on transgender and gender-diverse (TGD) adults.
 - Apply principles of neurodiversity-affirming practice in clinical, educational, or organizational settings
 - Develop strategies for advocacy, allyship, and systemic change that promote autonomy, dignity, and equity for neurodivergent adults.
 - Analyze the social, cultural, and structural factors that impact the lives of neurodivergent adults, such as stigma, ableism, and access to services
-
